Dear Colleagues!

The field of therapeutic GI endoscopy has been advancing day-by-day with the advent of new technologies and techniques. The 10th International Endoscopy Workshop «Advanced Digestive Endoscopy» will be held under the auspices of the Russian Endoscopy Training Centre of the Yaroslavl State Medical Academy and Yaroslavl State University named after P.G. Demidov in Yaroslavl on July 1 – 3, 2011.

The highlight of the conference will be live demo-sessions of advanced therapeutic technologies in GI endoscopy, state-of-the-art lectures and hands-on training on ex-vivo animal models (harvested pig stomachs and bovine colons) under the guidance of Professor Tohru Itoh (Kanazawa Medical University, Kanazawa, Japan).

The audio-visual transmission will be broadcast live from two endoscopic operating theatres of Yaroslavl Regional Cancer Hospital.

This advanced endoscopy workshop will allow participants to gain hands-on exposure to advanced endoscopy techniques and devices, utilizing a combination of animal models and simulators for training. Balanced viewpoints, special techniques and practical clinical approaches will be presented throughout the programme.

Live endoscopy include: management of premalignant lesions and early GI cancer: chromoendoscopy, narrow band image endoscopy, autofluorescence endoscopy, magnification endoscopy, endoscopic mucosal resections, endoscopic submucosal dissections; EUS and EUS-FNA, therapeutic ERCP.

Russian and English will be the official languages of the Workshop.

Welcome to Yaroslavl!
